Product No.	Description	Price												
Vermiculite-Premium South African Grade with Easy Trowel Additives - Pickup C & C Prices only														
PX55	A-Tops Pre-mix- 2 Cubic Ft.- 50 Bags per skid - Regular or pump Mix	32.00												
PB42 limited stock	A-Tops Regular Vermiculite- 4 Cubic Ft (plastic bag) 30 bags per skid	34.00												
Delivery cost based on distance, room available and route schedule														
Approximate Coverage Chart for In-ground Pools <table border="1"> <thead> <tr> <th>Size</th><th>A-Tops</th><th>Regular</th></tr> </thead> <tbody> <tr> <td>16 x 32</td><td>60</td><td>30</td></tr> <tr> <td>18 x 36</td><td>80</td><td>40</td></tr> <tr> <td>20 x 40</td><td>100</td><td>50</td></tr> </tbody> </table>			Size	A-Tops	Regular	16 x 32	60	30	18 x 36	80	40	20 x 40	100	50
Size	A-Tops	Regular												
16 x 32	60	30												
18 x 36	80	40												
20 x 40	100	50												
These figures are approximate and based on 2" thickness. Our experience demonstrates that you may get by with less. The amount of vermiculite may vary with the amount of water, mixing time, accuracy of excavation and troweling practice. Be sure to fill dips and low areas with other material so mix is not unnecessarily wasted.														
Flex Piping														
PF50	½" PVC Flex Pipe – 100 ft. Roll	100.00												
PF75	¾" PVC Flex Pipe - 100 ft. Roll	122.00												
PF10	1" PVC Flex Pipe - 100 ft. Roll	136.00

Salt System Corrosion Prevention

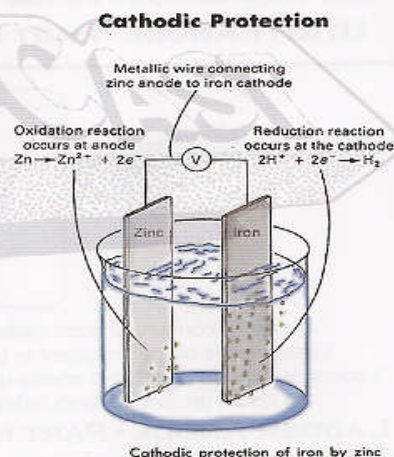

Part No.	Description	Price
Technodes: Swimming Pool Anodes		
TN-LD	Ladder Anode – Sold in Pairs	44.00/pair
TN-LT	Light Anode	29.00
TN-IL20	Inline Anode – 2" NEW Large Heavy Duty	130.00
TN-100	Inline Replacement Zinc For TN-IL – 1 1/2" & 2"	36.00

What is a Sacrificial Anode? A sacrificial metal anode is used to protect critical metal components in a salt system swimming pool. The sacrificial anode is connected electrically (either through direct contact or by use of a wire) to the metal to be protected. In a salt system pool, for example, a pool heater core will normally tend to corrode as a result of being in contact with the pool water. If this heater core is connected to a properly designed sacrificial anode, the anode will tend to corrode and transfer electrons to the heater core. At the interface between the pool water and heater core these electrons will create a chemical reaction that protects the heater core. The heater core (**cathode**) attracts electrons produced by the corroding sacrificial anode. The electrons react at the surface of the heater core with elements in the water. This reaction protects the heater core at the expense of the **sacrificial anode**. This transfer of electrons from the sacrificial anode to the metal to be protected is referred to as **Cathodic protection**. Cathodic Protection is illustrated to the right.

Examples of Sacrificial Anodes: All water heaters utilize sacrificial anodes to protect their steel tanks from corroding. The single most important factor in whether a water heater lives or dies is the condition of its sacrificial anode. Ships have anodes installed on their hulls to protect the steel hull from corroding in sea water. Lobster traps utilize sacrificial anodes to prevent corrosion on the ocean floor. Off shore oil rigs, buried pipelines, storage tanks, steel piers, and oil wells all utilize sacrificial anodes to prevent corrosion and premature failure of their critical components.

Why use TechNodes: TechNodes are the result of research done by Scientists at the Georgia Institute of Technology. TechNodes are sacrificial anodes designed specifically to protect critical metal components in Salt System Swimming Pools. TechNode In-line is designed to protect any metal components in the pools plumbing, including pool heaters and heat exchangers. TechNode Ladder will protect pool ladders that are submerged in the swimming pool. TechNode Light will prevent corrosion of metal components on underwater lights. TechNode Utility is designed to protect any other metal components in the swimming pool. TechNodes are cast from Mil Spec Zinc, have high surface area to volume characteristics resulting in the most efficient Pool Anodes on the market.

Aqua Sensor- Pool Alarms

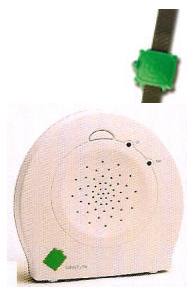

Swim Alert- MSRP \$599.00	780.00
Espio- MSRP \$699.00	910.00

SUMMARY OF KEY FEATURES

- Exclusive **Aquasensor** fall detection technology
- **ASTM F2208-02** Certified
- Magnetic keys for poolside activation/deactivation
 - Strong poolside alarm- 100 db
- Strong indoor wireless remote alarm (85db) with 100' range
 - Effective in pools up to 20' x 40' (1,000sqft)
 - Automatic rearming after bathing
 - All installation hardware included
 - Alarm Failure signals
 - Low battery light
 - Batteries included (4 "D")
- Chemical and UV-resistant materials of construction
 - Two-year limited warranty
- Poolside unit dimensions: 9.5" x 9" x 2.5"
 - **UL** listed
 - **NSF** certified

Safety Turtle

B101	Base Station- AC adapter, & user guide (Eng. & Spanish)	139.00
T101G,B,R,Y,or P	Turtle Wristband- Baby turtle plug for base station, key for locking buckle, Comes in Green, Blue, Red, Yellow, or purple	69.00
P101	Turtle Power- Battery pack & waterproof carrying bag	119.00

Deck Jets & Fountains

Deck Jets

Designed for residential pools, but with features only found on higher priced commercial water features. Eyeball is hidden from view by decorative cap. Four different cap colors are included with each deck jet. A variety of plumbing choices makes this deck jet easier to install. Only takes 3-5 GPM for a stream of water up to 10 feet high. Made for simple installation and trouble-free operation.

Deck Jets

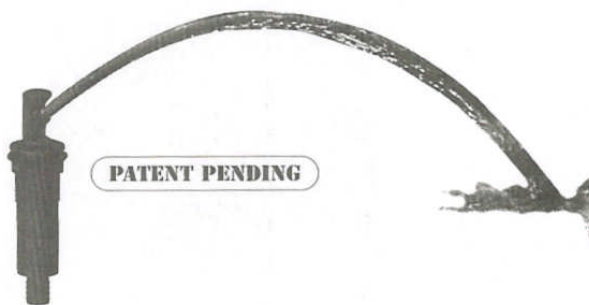

25597-000-000 | Deck Jet Assembly | \$ 110.00

Features:

- Individually Packaged
- Includes body, adjustable nozzle and four colored, round decorative caps (white, black, gray, tan)

Deck Jet and Wall Jet Specifications

GPM	3 GPM	4 GPM	5 GPM
Feet of Head	3.9	7.9	11
Height of Water Stream	3 Ft	6.5 Ft	10 Ft

Pop-UP Deck Jets

675-0700	3/4" Ribbed barb	N/A
675-0710	3/4" Smooth barb	"
675-0720	3/4" Socket	"
675-0730	1/2" Socket	"

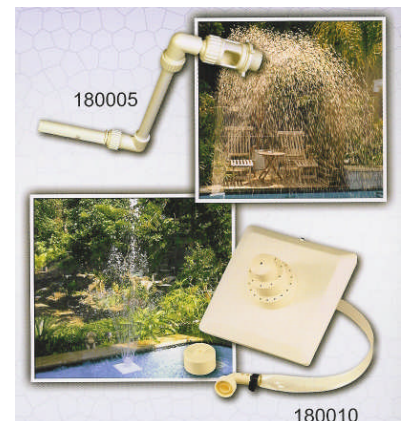

POP-UP WATER FEATURE

Features:

- ❶ Pops up when pressurized.
- ❷ Drops down when unpressurized.
- ❸ Solid 7/16" rod shaped water stream, projects at 45° angl
- ❹ Available in several body styles and colors.
- ❺ Max. flow 4.76 GPM @ 3 PSI = 48" cascade.

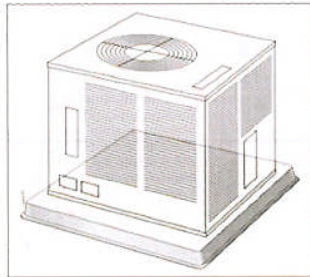

Fountains

180005	Waterfall Fountain	22.00

Hef-T-Pad

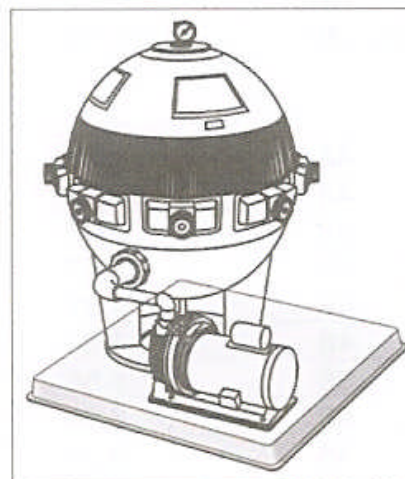

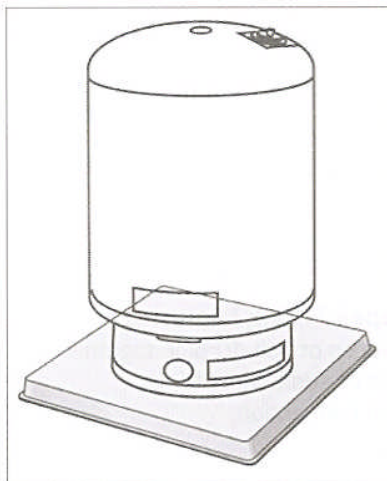

HEF-T-PAD™ Features:

- Injection molded from high impact polyolefin for strength and durability.
- Resistant to impact, UV degradation and weathering.
- Will not crack, flake or warp.
- Virtually impervious to climate changes.
- Drillable, permits installation of refrigerant and electrical lines under and through pad. Also permits equipment to be easily secured to pad.
- Unique, non-creep surface absorbs vibration and noise and keeps equipment in it's original position.
- Gray

Underside of Hef-T-Pad showing support ribs, stabilization pads and stabilization flange.

WELD-ON

**The Leader in Innovative Products
for the Plastic Pipe Industry**

700

Regular Bodied, fast setting, PVC Cement for all classes and schedules with interference fit through 4" diameter (except Schedule 80). This product may also be used on PVC foam core pipe.

CLEAR
3 Year Shelf Life
Meets ASTM D-2564

13552	740 PVC Regular Body Clear - Pint	14.00
10078	700 PVC Regular Body Clear - Gallon - While supplies Last	60.00

725 Wet 'R' Dry

Medium bodied, extremely fast setting, PVC cement for all classes and schedules with interference fit through 6" diameter, Schedule 80 through 4" diameter. Specially formulated for rigid and flexible applications where conditions are wet and/or when quick pressurization is desired. Can be used without primer on non-pressure systems if local codes permit.

AQUA BLUE
3 Year Shelf Life
Meets ASTM D-2564

10166	725 PVC Wet "R" Dry Aqua Blue - Pint	22.00
-------	--------------------------------------	-------

747 Pool 'R' Spa

Medium bodied, extremely fast setting, PVC cement for all classes and schedules with interference fit through 6" diameter, Schedule 80 through 4" diameter. Developed for rigid & flexible applications, wet conditions and/or quick pressurization. Can be used without primer on non-pressure systems if local codes permit

BLUE (fades to CLEAR)
3 Year Shelf Life
Meets ASTM D-2564
